💻 LeetCode — 🏠 Codeforces — 🍷 CodeChef

PROFESSIONAL SUMMARY

- **Full Stack MERN Developer** skilled in building secure, scalable web applications with **React.js, Node.js, Express.js, and MongoDB** backed by real-world internship experience in API optimization and a strong **DSA foundation (500+ problems, 100+ contests)**. Comfortable working across the stack, from responsive UI design with Tailwind CSS to backend performance tuning and database design. Currently building **GenAI** applications using **RAG**, prompt engineering, and **vector search**, with a growing interest in intelligent, AI-powered product development.

ACHIEVEMENTS & HONORS

- **Postman API Fundamentals Student Expert** – Certified in API testing and REST APIs.
- **LeetCode**: (Max Rating 1629) – **Global Rank 1548** in Biweekly Contest 182.
- **CodeChef**: 2-Star (Max Rating – 1423) – **Global Rank 1639** in Starters 225.
- Solved **500+** Data Structures & Algorithms problems; participated in **100+** contests.

EDUCATION

Madan Mohan Malaviya University of Technology
B.Tech in Computer Science and Engineering (CGPA: 8.33 / 10.0)

Gorakhpur, U.P., India
Sep 2023 – May 2027

EXPERIENCE

Bharat Electronics Limited - CRL Ghaziabad
Web Developer Intern

June 2025 – July 2025
Ghaziabad

- Developed an interactive **3D metro station model** using **HTML, CSS, JavaScript, and Three.js** for station layout planning and visualization.
- Implemented **drag-and-drop functionality** enabling dynamic placement and repositioning of metro station components in real time.
- Built reusable Three.js components and **modular scene architecture**, reducing new-component development time and supporting scalable 3D visualization.
- Optimized **rendering performance** through efficient scene management, improving frame rate/load time by **30%**.

PROJECTS

Pharma Plus — React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Razorpay, Cloudinary (GitHub · Demo)

July 2026

- Built a full-stack **MERN** pharmacy platform with medicine search, category filters, persistent cart, and order tracking, using **Redux Toolkit** for state management and **Tailwind CSS** for a responsive UI.
- Implemented **JWT authentication** with **bcrypt** password hashing and role-based access control, securing admin and customer routes with **Express Validator** input checks, CORS, and Helmet security headers.
- Integrated **Razorpay payment gateway** with server-side **signature verification** and a Cash-on-Delivery option, automatically updating order status and decrementing inventory on every successful transaction via **REST APIs**.
- Developed an admin dashboard for medicine, order, and user management, plus **Cloudinary**-backed prescription uploads (image/PDF) with an approval workflow, low-stock alerts, and sales analytics via Recharts.

Expense Manager — React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT (GitHub · Demo)

June 2026

- Developed a full-stack **MERN** expense management app with secure **JWT authentication**, **bcrypt** password hashing, and protected routes, enabling users to track income and expenses through a responsive React and **Tailwind CSS** interface.
- Built **RESTful APIs** with Express and **MongoDB** for complete income and expense **CRUD** operations, powering a real-time financial dashboard with total balance, monthly overview, and last-30-days analytics.
- Implemented Excel report generation using **XLSX** and **Multer** for income and expense history, allowing users to download detailed financial reports directly from the dashboard for offline analysis.
- Integrated a contact/feedback form with **Nodemailer** for automated email notifications, and used **Axios, React Router**, and **React Toastify** for seamless navigation and real-time UI feedback.

TECHNICAL SKILLS

- **Programming Languages**: C, C++, JavaScript, Java, Python, SQL
- **Frontend & Backend**: HTML, CSS, React.js, Node.js, Express.js, Tailwind CSS, REST APIs, Socket.IO, WebSockets
- **GenAI & AI Systems**: RAG, Vector Embeddings, Prompt Engineering, ChromaDB, Semantic Search, LLM Integration
- **Databases & Storage**: MongoDB, MySQL
- **Tools & Technologies**: Git, GitHub, Postman, VS Code

RELEVANT COURSEWORK

- Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, Distributed Systems, Software Engineering, Artificial Intelligence.
